

The fundamentals of building a basic **rainbow**

STEP ONE

 5 red squares

Start by building a 2D red cross.

STEP TWO

Fold up each side to create part of a cube.

STEP THREE

 12 squares: 4 yellow, 4 purple, 4 blue

Repeat step two in yellow, purple, and blue. This time, only build the outer walls with no bottom.

HOT TIP

To create a strong foundation, add a purple square at the base of the purple side.

STEP FOUR

-  2 equilateral triangles
-  1 square

Replicate this 2D build in orange.

STEP FIVE

Fold triangles in and stand the build on its side. Repeat in green and purple.

STEP SIX

Connect the colors in rainbow-order to finish.

Don't forget Roy G. Biv!
